

The figure is a scatter plot representing the spatial distribution of 100 Berlin districts. The x-axis is labeled with longitude values from 13.1 to 13.7, and the y-axis is labeled with latitude values from 52.3 to 52.7. Each district is represented by a colored dot (purple, blue, green, yellow) and its name is printed next to it. The districts are distributed across the map, with a high density of labels in the central area (around 13.4 longitude, 52.5 latitude). The plot shows a clear east-west divide, with districts like Spandau and Hakenfelde on the left, and districts like Buch and Karow on the right. The center of the plot is densely packed with district labels and dots.
